CERTIFICATE OF ANALYSIS

Brand Name: FYLLIKON EXTRA VIRGIN **Analysis Date:** 11/10/2019
Owner: SAKELLAROPOULOS ORGANIC FARMS
Origin: SPARTI LAKONIA GREECE
Harvest Period: October 2019 **Production Date:** 07/10/2019

Chemical Analysis

Oleocanthal	857 mg/Kg
Oleacein	101 mg/Kg
Oleocanthal + Oleacein (index D1)	958 mg/Kg
Ligstroside aglycon (monoaldehyde form)	<5 mg/Kg
Oleuropein aglycon (monoaldehyde form)	53 mg/Kg
Ligstroside aglycon (dialdehyde form)	<5 mg/Kg
Oleuropein aglycon (dialdehyde form)	<5 mg/Kg
Total tyrosol derivatives	857 mg/Kg
Total hydroxytyrosol derivatives	155 mg/Kg
Total polyphenols analyzed	1.011 mg/Kg

Comments :

The levels of oleocanthal are higher than the average values (135 mg/Kg respectively) of the sample included in the international study performed at the University of California, Davis.

The daily consumption of 20 g of the analyzed olive oil provides 20.2 mg of hydroxytyrosol, tyrosol or their derivatives. Olive oils that contain >5 mg per 20 gr belong to the category of oils that protect the blood lipids from oxidative stress according to the Regulation 432/2012 of the European Union.

It should be noted that oleocanthal and oleacein present important biological activity and they have been related with anti-inflammatory, antioxidant, cardioprotective and neuroprotective activity.

The chemical analysis was performed according to the method published in J.Agric. Food Chem., 2012, 60 (47) , pp 11696-11703, J.Agric. Food Chem., 2014 62 (3) , 600-607 and OLIVAE, 2015, 122, 22-33.
